

Sustainability Plan

Sustainability & Positive Impact

Our Commitment

At Joondalup Resort, we are fortunate to operate within one of Perth's most unique natural settings. Surrounded by established bushland, rolling fairways and native wildlife, we recognise the importance of looking after the environment and community that make our resort so special.

Sustainability for us is about making practical choices every day, whether that's reducing waste, managing resources responsibly, supporting local organisations or creating positive experiences for our guests, team members and community.

Caring for Our Natural Environment

The natural surroundings of Joondalup Resort are a defining part of the guest experience. From native birdlife and kangaroos to mature trees, lakes and landscaped gardens, the environment around us is something we value and work hard to maintain.

Our focus includes:

Maintaining and preserving the resort's bushland and landscaped areas

Supporting local wildlife habitats throughout the property

Responsible management of gardens, lakes and golf course surrounds

Ongoing monitoring of irrigation systems and watering schedules

Reviewing water use practices to help ensure efficient irrigation across the resort and golf course

Continually identifying opportunities to improve environmental outcomes across our operations

Energy & Resource Management

Across the resort, our team follows a range of operational practices aimed at reducing unnecessary energy consumption without compromising guest comfort.

These include:

Turning off lighting, air conditioning and equipment in unoccupied areas

Operating meeting rooms and event spaces according to occupancy requirements

Using automated systems in selected areas to assist with energy management

Encouraging team members to be mindful of electricity and water usage as part of their daily responsibilities

Regularly reviewing procedures that can help improve efficiency and reduce waste

While many of these initiatives happen behind the scenes, they form part of our everyday approach to responsible operations.

Sustainable Accommodation & Events

As a leading destination for accommodation, conferences, meetings and events, we understand that even small changes can make a positive difference.

Initiatives include:

- Guest room servicing and linen refreshes tailored to guest requirements and length of stay
- Meeting and event spaces prepared according to booking requirements to avoid unnecessary energy use
- Digital event documentation and communication where practical
- Ongoing review of operational practices to reduce waste and improve efficiency across accommodation and events

By incorporating sustainable practices into day to day operations, we aim to reduce our environmental impact while continuing to deliver exceptional service.

Responsible Food & Beverage Practices

Joondalup Resort's food and beverage team carefully plans menus and catering requirements to help minimise unnecessary waste while delivering high quality dining experiences.

Our approach includes:

- Menu planning designed to maximise ingredient utilisation
- Function and conference menus tailored to expected attendance numbers
- Careful purchasing and stock management practices
- Ongoing monitoring of food production levels to reduce avoidable waste
- Reviewing opportunities to improve efficiency across our food and beverage operations

Supporting Our Community

Joondalup Resort is proud to support a range of community, sporting and charitable initiatives throughout the year.

This includes:

- Hosting charity golf days and fundraising events
- Supporting local community and not for profit organisations
- Sponsoring selected sporting, community and charitable initiatives
- Providing facilities and event spaces for fundraising and awareness activities
- Helping local organisations bring people together through events and community engagement

We understand the important role businesses can play within the community and are proud to support causes that make a positive difference.

Supporting Tourism & Business Events in Western Australia

As a major tourism, golf and business events destination in Perth's northern suburbs, Joondalup Resort contributes to the local economy through employment, visitor expenditure and the delivery of conferences, meetings, exhibitions, weddings and golf events.

By bringing visitors to the region and providing accommodation, dining, golf, leisure and event facilities in one location, we help support local businesses, suppliers and the wider visitor economy.

Looking Ahead

We recognise that sustainability is an ongoing responsibility. Joondalup Resort remains committed to identifying practical improvements across our operations, supporting our community and preserving the natural environment that makes our destination unique.

Through continuous improvement and thoughtful management of our resources, we aim to create positive outcomes for our guests, our team and the community for years to come.
